Should modification be needed as to the number of cards or to the contents of the cards themselves, Client can request for a custom quotation from the calligrapher. If you are familiar with the calligrapher's work, know the value that she puts upon the calligraphy as the focus of the design, that most often, the writing is the design itself. Illustrations, paintings and other adornments are kept at a minimum, if not nil.

The calligrapher reserves the right to decline the commission if she believes the values and aesthetic do not align with her discipline.

***The work:** The Client shall receive a high resolution scan of their approved layout or writing. The scan will be black and white, tinted with the color of choice of the Client.*

***Timing:** Work will start with the full details and text turned over to the calligrapher. Design work typically takes 5 to 7 working days. The calligrapher shall present at least 2 writing samples. Client shall choose between those samples and work on the full suite shall commence after. We are allowed 3 revisions. After the third, additional compensation will be required.*

***Turnover:** By default, it will be a Photoshop or TIFF file with the writing and typography rasterized. Should the client need another kind file as specified by their printer or other suppliers, it should be made known prior to submission of the final file.*
